

Growing with Love and Prayers

Objective: Help each individual pray throughout the Lenten season.

Materials: Small planting pot, grass seeds, and soil

Week 1: Allow the kids to decorate their own planting pot and plant the grass seeds in their pots. Explain to the kids that their goal is to read 3 Hail Mary every day and on completing this task, they are allowed to water their plant. (Do not let the kids take home the plants but keep the pots in an area where there is sunlight)

Week 2: Allow the kids to water their pots only if they have completed their prayers and continue doing so for the rest of the weeks

Note to Huynh Truong:

Make sure to grow more than enough plants for your class just in case one of the plant dies. Explain to the kids that each plant represents your love for Jesus and the prayers show your appreciation/love toward him. When the plant has been fully grown, it represent Jesus' resurrection. If the plant dies, give the student a new plant and explain to them that no matter how much you neglect God/Jesus, they will always be with you.
